

ALL INDIA INSTITUTE OF SPEECH AND HEARING  
MANASAGANGOTTHRI  
MYSORE 570 006

ENTRANCE EXAMINATION 2019

M.S.Ed. (HEARING IMPAIRMENT)

Time: 50 minutes

Max. Marks: 50

**Instructions:** Answer all the questions  
Each question carries one mark  
Use ball point pen with black ink  
Do not overwrite

Select the most appropriate answer from among the four alternatives given and indicate it by marking an 'X' in the box adjacent to the correct answer (in the answer sheet). For example, if c) is the correct answer for a given question, then indicate your answer as shown below:

a)  b)  c)  d)

\*\*\*

- Adventitiously deaf are those children who acquire deafness \_\_\_\_\_.  
a) before birth c) sometime after birth  
b) at the time of birth d) at none of the mentioned instances
- Individualised educational plans for children with special needs should include the crucial details about \_\_\_\_\_.

- a) mean
  - b) median
  - c) mode
  - d) standard deviation
9. The study of meaning of words in a language is dealt in \_\_\_\_\_.
- a) phonology
  - b) syntax
  - c) morphology
  - d) semantics
10. Among the listed, \_\_\_\_\_ is a natural method for developing language in children with hearing impairment.
- a) Box Technique
  - b) Directed Activity
  - c) Fitzgerald Key
  - d) Apple Tree
11. When using tuning forks for testing individuals with hearing loss, if the tone is audible at the external ear it is known as \_\_\_\_\_.
- a) Rinne positive
  - b) Rinne neutral
  - c) Rinne negative
  - d) none of the mentioned
12. An individual is considered to have severe hearing loss when the pure tone thresholds are \_\_\_\_\_.
- a) between 56 to 70 dB HL
  - b) between 91 to 110 dB HL
  - c) between 71 to 90 dB HL
  - d) greater than 110 dB HL
13. In the phonemes given below, \_\_\_\_\_ is an example of glottal sounds.
- a) /b/
  - b) /z/
  - c) /f/
  - d) /h/
14. Suprasegmental features will include \_\_\_\_\_ of speech.
- a) accent
  - b) intonation
  - c) stress
  - d) all the mentioned aspects
15. Diphthongs are produced when \_\_\_\_\_ sounds are combined.
- a) two vowel
  - b) two consonant
  - c) a vowel and a consonant
  - d) none of the mentioned
16. In the process of training children with mental retardation, the approach wherein an activity is broken down and sequenced into its component parts is known as \_\_\_\_\_.
- a) cooperative learning
  - b) scaffolding
  - c) unit approach
  - d) task analysis

- |                 |               |
|-----------------|---------------|
| a) hemiplegia   | c) diplegia   |
| b) quadriplegia | d) paraplegia |
18. A type of learning disability in which students face severe difficulty in reading due to inability to recognize and comprehend written words is known as \_\_\_\_\_.
- |                |               |
|----------------|---------------|
| a) dyspraxia   | c) dyslexia   |
| b) dyscalculia | d) dysgraphia |
19. An important method in educational psychology which specifically implies looking inward or within is \_\_\_\_\_.
- |                    |                        |
|--------------------|------------------------|
| a) introspection   | c) observation         |
| b) clinical method | d) experimental method |
20. A technique in educational psychology which is used to determine the degree to which individuals are accepted in a group is \_\_\_\_\_.
- |                       |                        |
|-----------------------|------------------------|
| a) statistical method | c) sociometry          |
| b) projective method  | d) experimental method |
21. Of the following, \_\_\_\_\_ is a combined method of communication existing in the education of the deaf.
- |                             |                         |
|-----------------------------|-------------------------|
| a) educational bilingualism | c) listening & speaking |
| b) reading & writing        | d) sign language        |
22. Chomsky gives most of the credit of language acquisition to the innate capacity called \_\_\_\_\_.
- |                             |                                |
|-----------------------------|--------------------------------|
| a) innate language device   | c) language acquisition device |
| b) language learning device | d) language learning capacity  |
23. The first step in the stages of curriculum development process is \_\_\_\_\_.
- |                                      |                                  |
|--------------------------------------|----------------------------------|
| a) preparation of learning materials | c) determination of the content  |
| b) formulation of objectives         | d) implementation and evaluation |
24. The method which emphasizes on educating children through joyous experience and focuses on each child's individuality is \_\_\_\_\_.
- |                      |                        |
|----------------------|------------------------|
| a) Montessori method | c) kindergarten method |
| b) play-way method   | d) joyful learning     |
25. When arranging classrooms for children with hearing impairment, \_\_\_\_\_ should be avoided.
- |  |   |
|--|---|
| a) visibility of teacher & teaching aids | c) reduction of reverberation of sounds |
| b) seating away from the teacher         | d) preventing unnecessary noise         |

26. National Policy on Education 1986 recommended for organizing literacy campaigns to liquidate \_\_\_\_\_.
- a) mass illiteracy
  - b) self employment
  - c) mass literacy
  - d) none of the mentioned
27. The functions of the NCTE do not include \_\_\_\_\_.
- a) accreditation of teacher education institutes
  - b) direct preparation of learning materials
  - c) laying down of norms for teacher education institutes
  - d) orientation to senior teacher educators
28. The middle ear disease of long-standing duration that is associated usually with a perforation of the tympanic membrane and pus-like discharge is called \_\_\_\_\_.
- a) middle ear infection
  - b) serous otitis media
  - c) chronic otitis media
  - d) acute otitis media
29. A sound which is not made up of several overtones, but is of only one frequency is called \_\_\_\_\_.
- a) hertz
  - b) puretone
  - c) warble tone
  - d) decibels
30. The specific training which is given to children with hearing impairment to utilize the residual hearing is termed as \_\_\_\_\_.
- a) auditory training
  - b) language training
  - c) speech training
  - d) communication training
31. The three senses through which we can gather information about speech are \_\_\_\_\_.
- a) auditory, vision and touch
  - b) auditory, vision and smell
  - c) auditory, vision and taste
  - d) auditory, touch and taste
32. In addition to normal development errors, other major error(s) reported in consonant production among children with hearing impairment are \_\_\_\_\_.
- a) omission
  - b) substitution
  - c) distortion
  - d) all the mentioned
33. The third Indian Education Commission headed by Prof. Kothari was the first official measure to emphasise on education of children with special needs on \_\_\_\_\_ basis.
- a) humanitarian
  - b) egalitarian
  - c) utilitarian
  - d) sectarian
34. Voluntary, non-governmental educational institutions are different from other private educational institutions in that they are \_\_\_\_\_.
- a) funded by government
  - b) profit making
  - c) recognised by government
  - d) non-profit making

35. When parents of a child with congenital impairments make irrational complaints that poor health care services at the time of confinement led to the problem, then they might be reacting to the disability with the defence mechanism of \_\_\_\_\_.
- |                       |               |
|-----------------------|---------------|
| a) reaction formation | c) projection |
| b) displacement       | d) acting out |
36. Children with hearing impairment may not face any significant delay in cognitive development. However, presence of the communication disorder may affect their \_\_\_\_\_ as a result of lack of exposure.
- |                        |                      |
|------------------------|----------------------|
| a) physical growth     | c) motor functioning |
| b) adaptive behaviours | d) visual perception |
37. A child with intellectual disabilities with around \_\_\_\_\_ IQ has better prospects of responding positively to special educational intervention.
- |             |                 |
|-------------|-----------------|
| a) 50 to 70 | c) 20 to 35     |
| b) 35 to 50 | d) less than 20 |
38. The contemporary thrust in the field of special education is to tailor-make a comprehensive curriculum according to the differential abilities of children focusing on \_\_\_\_\_ skills that will be required in their current as well future domestic, academic, vocational and social environments.
- |               |                  |
|---------------|------------------|
| a) functional | c) interpersonal |
| b) literacy   | d) occupational  |
39. Programmed instruction is a systematic process of analysing and organising learning materials sequentially for \_\_\_\_\_.
- |                          |                           |
|--------------------------|---------------------------|
| a) power point slideshow | c) instructional software |
| b) self instruction      | d) developing games       |
40. When discrete data like the marks scored by individual students in a class is to be presented graphically, \_\_\_\_\_ is best suited for the purpose.
- |               |                  |
|---------------|------------------|
| a) bar graphs | c) pie charts    |
| b) histograms | d) scatter-plots |
41. Reading task can be made viable for children with low vision with the help of \_\_\_\_\_ print.
- |             |           |
|-------------|-----------|
| a) Braille  | c) Glossy |
| b) Embossed | d) Large  |
42. Children with hearing impairment are generally found to be \_\_\_\_\_ learners.
- |           |              |
|-----------|--------------|
| a) verbal | c) versatile |
| b) visual | d) vivid     |
43. Ability training for children with learning disabilities might include training in \_\_\_\_\_ aspects.
- |                     |                      |
|---------------------|----------------------|
| a) psycholinguistic | c) sensory           |
| b) perceptual-motor | d) all the mentioned |

44. For better localisation of sounds, \_\_\_\_\_ hearing aids are better.
- a) body level binaural                      c) ear level binaural  
b) body level monaural                      d) ear level monaural
45. Squealing sound from hearing aids worn by children with hearing impairment is found to disturb teachers and other children in mainstream classrooms. A common cause for such problem could be \_\_\_\_\_.
- a) low battery power                      c) break in cords  
b) moisture in tubing                      d) ill-fitting ear moulds
46. A young child trying to imitate the 'rrrrr...' running sound of a motorized vehicle like car or bus is producing \_\_\_\_\_ sounds.
- a) lateral                      c) trill  
b) fricative                      d) affricative
47. Of the following, \_\_\_\_\_ is the IPA transcription for the English word 'yacht'.
- a) /yatch/                      c) /yaught/  
b) /jɑ:tʃ/                      d) /jɔtʃ/
48. When training a child with hearing impairment in verbal communication, if the residual hearing is not very beneficial, combining use of \_\_\_\_\_ sense with it will serve to be helpful.
- a) olfactory                      c) tactile  
b) visual                      d) gustatory
49. When training children with hearing impairment in skills for reading comprehension, \_\_\_\_\_ reading activities will be more helpful.
- a) chorus                      c) rote  
b) loud                      d) silent
50. Among the different stakeholders in the community, \_\_\_\_\_ can produce maximum impact in creating awareness among the public about communication disorders like hearing impairment.
- a) parent                      c) media  
b) teachers                      d) doctors
