Correct Answer:- Option-C

Question56:-Read the following passage and answer by choosing the correct alternatives given

Pure water lacks taste and smell. All living things need water in order to survive. 40% to 90% of the weight of all organisms is water. A human being is 60% water, most of which is contained in the cells, which need water to live. The human body uses water to remove waste throughout the body. Ancient philosophers thought of water as a true building block by which all other liquids are measured until the late 18th century. The chemist by the name of Cavendish made water by using a mixture of hydrogen and oxygen. We now know that water is 2 parts hydrogen to 1 part oxygen in our universe, and 1 part oxygen, the element that we breathe in order to survive.

How does water help your body?

A:-It provides you oxygen

B:-It transport nutrients

C:-It heals cuts

D:-It protects you from sunburn

Correct Answer:- Option-B

Question57:-Read the following passage and answer by choosing the correct alternatives given

Pure water lacks taste and smell. All living things need water in order to survive. 40% to 90% of the weight of all organisms is water. A human being is 60% water, most of which is contained in the cells, which need water to live. The human body uses water to remove waste throughout the body. Ancient philosophers thought of water as a true building block by which all other liquids are measured until the late 18th century. The chemist by the name of Cavendish made water by using a mixture of hydrogen and oxygen. We now know that water is 2 parts hydrogen to 1 part oxygen in our universe, and 1 part oxygen, the element that we breathe in order to survive.

..... is the most abundant element in universe

A:-water

B:-oxygen

C:-hydrogen

D:-carbon dioxide

Correct Answer:- Option-C

Question58:-Read the following passage and answer by choosing the correct alternatives given

Pure water lacks taste and smell. All living things need water in order to survive. 40% to 90% of the weight of all organisms is water. A human being is 60% water, most of which is contained in the cells, which need water to live. The human body uses water to remove waste throughout the body. Ancient philosophers thought of water as a true building block by which all other liquids are measured until the late 18th century. The chemist by the name of Cavendish made water by using a mixture of hydrogen and oxygen. We now know that water is 2 parts hydrogen to 1 part oxygen in our universe, and 1 part oxygen, the element that we breathe in order to survive.

Find out the word from the passage which means 'existing in large quantities'

A:-ancient

B:-transport

C:-abundant

D:-building block

Correct Answer:- Option-C

Question59:-Read the following passage and answer by choosing the correct alternatives given

Pure water lacks taste and smell. All living things need water in order to survive. 40% to 90% of the weight of all organisms is water. A human being is 60% water, most of which is contained in the cells, which need water to live. The human body uses water to remove waste throughout the body. Ancient philosophers thought of water as a true building block by which all other liquids are measured until the late 18th century. The chemist by the name of Cavendish made water by using a mixture of hydrogen and oxygen. We now know that water is 2 parts hydrogen to 1 part oxygen in our universe, and 1 part oxygen, the element that we breathe in order to survive.

chemist by the name of Cavendish made water by using a mixture of hydrogen and oxygen. We now know that water is 2 parts hydrogen in our universe, and 1 part oxygen, the element that we breathe in order to survive.

Find out the antonym of 'cease'

A:-measured

B:-remove

C:-transport

D:-survive

Correct Answer:- Option-D

Question60:-Read the following passage and answer by choosing the correct alternatives given

Pure water lacks taste and smell. All living things need water in order to survive. 40% to 90% of the weight of all organisms is water. Our human being is 60% water, most of which is contained in the cells, which need water to live. The human body uses water to remove waste throughout the body. Ancient philosophers thought of water as a true building block by which all other liquids are measured until the late 18th century. A chemist by the name of Cavendish made water by using a mixture of hydrogen and oxygen. We now know that water is 2 parts hydrogen in our universe, and 1 part oxygen, the element that we breathe in order to survive.

Which of the following is true ?

A:-human cells do not need water

B:-all living things need water to survive

C:-pure water has taste and smell

D:-none of these

Correct Answer:- Option-B
